Abstract

The purpose of this document is to show the stages for the design and development of the website for the company Secure Network. In particular, we will focus on the frontend development of the site describing the design in the large and in the small through the diagrams C-IDM and P-IDM. We will report some images of the final graphics of the site and illustrate hypothetical scenarios of interaction with it. Finally, we will present the database structure designed to support the site with the respective E-R diagram.

C-IDM Diagram

In this section we report the C-IDM diagram that we used as a basic structure for the development of the design of our website. It includes all the *Topics*, *Kind of Topics*, *Groups of Topics*, *Multiple Groups of Topics* and *Nested Groups of Topics* regarding the specification. In addition, all relevant relations and their cardinalities have been reported.

Mapping Content Tables into Pages

Continuing, we present the result of the application of the process of page mapping to the content tables reported in the last chapter. Each table has been divided into a series of pages, in order to increase the degree of granularity.

6.2.3 Kind of Topic: Area

The figure displays four commented screenshots illustrating the navigation and content structure of the 'Area' page:

- Secure Network Header:** Shows the main header with 'Secure Network' and navigation links: Services, Areas, Team, Resources, About, Contacts. A red arrow labeled 'LANDMARKS' points to the 'Secure Network' logo. Another red arrow labeled 'AREAS ← ORIENTATIONAL INFO' points to the 'Areas' link.
- Training Section:** Titled 'Training' with 'See Categories' and 'See Team' buttons. A red arrow labeled 'STRUCTURAL LINKS' points to the 'See Categories' button. An illustration of a person sitting at a desk with books is shown.
- About This Area:** A section titled 'About This Area' containing text about course delivery and tailored training. A red arrow labeled 'STRUCTURAL LINKS' points to the 'See Team' button.
- Categories Of Services:** A section titled 'Categories Of Services' with three cards: 'Binary Exploitation Training', 'Mobile Security Training', and 'Web Exploitation Training'. Each card has an 'Explore Category' button. Red arrows labeled 'TRANSITIONAL LINK' point from the 'See Categories' button in the 'Training' section to each category card.
- Currently Employing:** A section titled 'Currently Employing' with a 'MANAGER' profile for Riccardo Cospite. Below are profiles for Andrea Jegher, Diego Zaffaroni, and Enrico Coronese. Red arrows labeled 'TRANSITIONAL LINK' point from the 'See Team' button in the 'About This Area' section to each team member profile.
- Team Members:** A section titled 'CONTENT FROM TEAM MEMBERS' showing profiles for Ilaria Buonagurio and Marcello Pogliani. Red arrows labeled 'TRANSITIONAL LINK' point from the 'See Team' button in the 'About This Area' section to each team member profile.
- Secure Network Footer:** Shows the footer with 'Secure Network' and navigation links: Services, Areas, Team, Resources, About, Contacts. A red arrow labeled 'LANDMARKS' points to the 'Secure Network' logo. A red arrow labeled 'CONTACT LINK (social)' points to the social media icons. The footer also includes the address: Secure Network S.r.l. - Via Veltorta, 48 - 20127, Milano MI, Italy - O.F./P.IVA 04205230966.

6.2.4 Kind of Topic: Person

The figure displays a commented screenshot of the "Person" page from the "Secure Network" application. The page is divided into several sections:

- Header:** "Secure Network" logo, navigation menu (Services, Areas, Team, Resources, About, Contacts).
- User Profile:** "Tommaso Pescanova" profile picture, "My Area" and "My Services" buttons.
- Orientational Info:** "LANDMARKS" (Team) and "STRUCTURAL LINKS" (My Area, My Services).
- About Section:** "About Tommaso..." with a bio and a "Read More" button.
- Content From Area:** "Current Occupation" section featuring "EMPLOYEE AT Enterprise Security" with a piggy bank icon and a "Discover Area" button.
- Content From Services:**
 - "Provided Services" section with "REFERENCE FOR Web Applications & Web Services" (Web applications store our personal information, manage our finances, share our documents and are an ...)
 - "Device Analysis" service (The experience gained through the years contributed building the needed know-how to successfully manage digital ...)
 - "Virtual Infrastructures" service (Thanks to their many advantages, virtual infrastructures are now widely employed in corporate environments to ...)
 - "Wireless Network & Infrastructures" service (Wireless networks are widely used both in personal and in corporate environments, providing a convenient ...)
- Structural Links:** A large blue arrow labeled "STRUCTURAL LINK" points from the "Wireless Network & Infrastructures" section back up to the "STRUCTURAL LINKS" in the "About" section.
- Landmarks:** A red arrow labeled "LANDMARKS" points to the "LANDMARKS" in the "Orientational Info" section.
- Contact Link (Social):** A red arrow labeled "CONTACT LINK (social)" points to the social media icons at the bottom.

6.2.8 Group: Team

The figure consists of five commented screenshots illustrating the Team page of a website:

- Top Left:** A screenshot of the "Secure Network" homepage featuring a navigation bar with links: Services, Areas, Team, Resources, About, and Contacts. Below the navigation is a section titled "A Cutting-Edge Team Of Researchers" containing two buttons: "Our Founders" and "Our Employees". A red box highlights the "Team" link in the navigation bar, labeled "LANDMARKS". Red arrows point from the "Our Founders" and "Our Employees" buttons to the "STRUCTURAL LINKS" label.
- Top Right:** A screenshot titled "Our Founders" showing profiles for Alvise Biffi and Stefano Zanero. Each profile includes a "Discover" button. Red arrows labeled "GROUP LINK" point from the "Discover" buttons to the "STRUCTURAL LINKS" label.
- Middle Left:** A screenshot titled "Who We Are" containing descriptive text about the company's capabilities and research focus. Red arrows labeled "STRUCTURAL LINKS" point from the text blocks to the "STRUCTURAL LINKS" label.
- Middle Right:** A screenshot titled "Our Employees" showing profiles for Alberto Volpatto, Alex Conti, and Andrea Jegher. Each profile includes a "Discover" button. Red arrows labeled "GROUP LINK" point from the "Discover" buttons to the "STRUCTURAL LINKS" label.
- Bottom:** A screenshot titled "We Are Hiring!" with a "Contact Us" button. It features a "TRANITIONAL LINK" arrow pointing to the "Contact Us" button and a "STRUCTURAL LINK" arrow pointing to the "STRUCTURAL LINKS" label. At the bottom, there is a "Secure Network" footer with social media icons and a "CONTACT LINK (social)" label.

Interaction Scenarios

7.1 Scenario 1

An attorney from the Milan prosecutor's office is looking for a company able to retrieve evidence from a device linked to a court case.

She got the name of Secure Network and would like to find out if they can perform the job she is looking for and, in case, get a quote. To do so, she connects to the company website.

She directly goes to the *Areas* page and, after reading the short abstracts, she chooses to visit the page of the *Enterprise Security* area. There, she clicks on *See Categories* and examines the list that is shown to her.

Among the options, she selects the *Digital Forensics* category and, in the page that opens, she finds *Forensics Acquisition* that seems to be exactly the service she needs. After opening the page to confirm her assumptions, she browses to the *Contacts* page to send them an email.

Figure 7.1: Screenshots describing interactive scenario 1.

7.2 Scenario 2

A recent graduate of the Politecnico is looking for his first job in the computer security field. A few days ago, he attended a workshop given by Alvise Biffi in which he mentioned that the company he founded is hiring but unfortunately he does not remember the name.

He thinks it is called Secure Network but, to be completely sure, he connects to their website and goes to the *Team* page where he finds *Alvise Biffi*. After reading the founder's biography abstract and decides to visit his page to have a complete reading.

After that, he goes back to the *Team* page (using the breadcrumbs on top of the page) to give another look to the employee list and there he finds the *We are hiring* title and clicks on the *Contact Us* button.

Figure 7.2: Screenshots describing interactive scenario 2.

7.3 Scenario 3

During a conference, an entrepreneur came in contact with this security company from Milan that is called Secure Network. He is impressed with what he heard about them and would like to discover what they do more in depth.

After connecting to the website, he browses the *Home* page and reads the description of the company. He decides to click the *About Us* button and in that page he discovers more about their history.

There, he finds a section where the company gives some reason why cybersecurity matters and decides to give a look to the *Services* they offer. He only wants to have an overview, so he decides to click on the *Group by Category* button in order to have a look at that list.

Figure 7.3: Screenshots describing interactive scenario 3.

7.4 Scenario 4

During a lecture of his course of Computer Security at Politecnico, professor Stefano Zanero mentioned an interview with him published in 2017. One of his students would really like to read it so she visits to the website of his company, Secure Network, as he told her to do. Right on the *Home* page, she finds some of the latest news and she spots one about his professor that she wants to read. After reading that article, she goes back to the *Resources* page using the breadcrumbs on top and she selects the year *2017*. Once on the year page, she filters the resources to see only the news and then she finds the interview that she was looking for.

DB Design

In this last chapter we report the structure of the database designed to support the website and manage the information contained in it. We started with the conceptual design, by which is possible to identify the first layer of abstraction of our data. It has been modelled with the *Entity-Relationship diagram*.

Figure 8.1: ER Diagram

Then we proceed with the logic design, which allow to better describe the *E-R Model*. Some additional tables have been identified to better support the implementation.

- **Area.** An *Area* is identified by an **id**, has a **name**, a **text** description, a string path to the image, **img**, and a **path** to reach the specific page.
- **Person.** A *Person* is identified by an **id**, has a **name**, a **surname**, a **text** description, a string path to the image, **img**, a **path** to reach the specific page. In addition, the relation called *Assignment*, among *Person* and *Area*, has been merged within the first table, resulting in the addition of two fields: the **area_id** as foreign key and the **role** of the person within the area. Each *Person* is assigned to exactly one *Area*, whereas in each *Area* several *People* are assigned.
- **Service_Category.** This table was born due to normalization purposes. It would have been redundant adding for each *Service* information about the complex attribute *Category*. To avoid replication, we decided to perform this normalization procedure. A *Service_Category* is identified by an **id**, has a **name**, a **text** description, a string path to the image, **img**, and a **path** to reach the specific page.
- **Service.** A *Service* is identified by an **id**, has a **name**, a **text** description, a string path to the image, **img**, a **path** to reach the specific page. The **category_id** is the foreign key, used to support the normalization process described in the previous table. Each *Service* is mapped with exactly one *Service_Category*, whereas each *Service_Category* is mapped with several *Services*. In addition, the relation called *Offer*, among *Service* and *Area*, has been merged within the first table, resulting in the addition of the field **area_id** as foreign key. Each *Service* is offered by exactly one *Area*, whereas each *Area* offers several *Services*.
- **Person_Service.** This table was born to support the *N-N* relation, *Provide*, among *Person* and *Service*. A *Person_Service* is identified by an autoincremental **id** and presents a boolean field, **isReference**, which states whether or not the *Person*, identified by the foreign key **person_id**, is the reference for the *Service*, identified by the foreign key **service_id**.
- **Resource.** A *Resource* is identified by an **id**, has a **type**, a **name**, a **date**, a **text** description, a **subtitle** a string path to the **icon**, and a **path** to reach the specific page.
